

CITY OF DURHAM
MID-BLOCK STREET LIGHT PETITION

The Transportation Division has determined that the _____ block of _____ meets the requirements to receive additional street lighting when requested by a majority of the property owners.

The following signatures indicate the property owner’s request for the installation of additional street light(s) in the subject block. Home Owners Associations have been represented by the signature of one of its officers.

**Property owners who have purchased property within the last two (2) years,
please list date of purchase and previous property owner’s name**

Street light(s) will be ordered for installation upon receipt of a petition constituting a request from at least 51% of the current property owners. The number of street light(s) to be added on a street block will be based on the street width, length, obstructions and service availability. Placement of the lights will be as close to AASHTO standards as physically possible.

Petitioners should be aware that new service pole(s) will be installed when existing poles are not available to support the additional street lights. In areas where electrical service is available only from the rear of private property, the affected property owner will grant permission to the applicable power company to trench to the power source. Upon completion, trenched areas will be backfilled to the original grade, but will not be seeded or mulched.
